- Target Audience Keywords: Unisex Adult

Cet Offry Lotion is an emollient used for dry, itchy skin and other skin problems. It helps trap moisture an oil within skin.

Cetyl alcohol and stearyl alcohol are common ingredients in skincare products, including gentle skin cleansers. Here's some information regarding their usage, side effects, and storage:

Usage:

- Cetyl alcohol and stearyl alcohol are fatty alcohols commonly used in skincare products as emollients, thickeners, and moisturizers.
- In a gentle skin cleanser, they help to cleanse the skin without stripping away its natural oils, leaving it soft and hydrated.
- To use the gentle skin cleanser, wet your face with water, apply a small amount of the cleanser to your hands or a cleansing pad, gently massage it onto your face in a circular motion, then rinse thoroughly with water and pat dry.

Side Effects:

- Generally, cetyl alcohol and stearyl alcohol are considered safe for most people when used in skincare products.
- However, some individuals may experience mild irritation or allergic reactions, especially if they have sensitive skin or allergies to these ingredients.
- If you experience any redness, itching, burning, or swelling after using a product containing these ingredients, discontinue use and consult a dermatologist.

Storage:

- Store the gentle skin cleanser in a cool, dry place away from direct sunlight.
- Make sure the container is tightly closed to prevent contamination and to maintain the efficacy of the product.
- Keep the product out of reach of children and pets.

Always remember to perform a patch test before using a new skincare product, especially if you have sensitive skin or allergies. If you have any concerns or experience adverse reactions, consult a healthcare professional or dermatologist for advice.
