Amlodipine plus Atenolol Tablets

COMPOSITION

DIPART-AT

Each uncoated tablet contains: Amlodipine besylate equivalent to Amlodipine 5 mg and Atenolol IP 50 mg

INDICATIONS

- Hypertension
- Chronic stable angina

DOSAGE AND ADMINISTRATION

The recommended dosage is one tablet of **DIPART-AT** daily. If necessary, the dosage may be increased to two tablets daily. The dosage however should be individualized.

Renal Impairment

Dosage of **DIPART-AT** should be adjusted in cases of severe impairment of renal function. Dosage of atenolol should not exceed 50 mg/day when creatinine clearance is 15-35 ml/min/1.73 m.

Hepatic impairment

The recommended initial dose in patients with hepatic impairment is half tablet of **DIPART -AT**

Elderly patients

Dose selection for an elderly patient should be cautious, usually starting at half tablet of **DIPART-AT**.

CONTRAINDICATIONS

Hypersensitivity to either component, sinus bradycardia, second and higher degrees of heart block, cardiogenic shock, hypotension and overt cardiac failure.
